20<sup>th</sup> May 2009

To whom it may concern,

I recently had the pleasure of dealing with Engineering Training Australia (ETA), as part of my skills assessment towards a qualification recognised by the Trade recognition Australia (TRA).

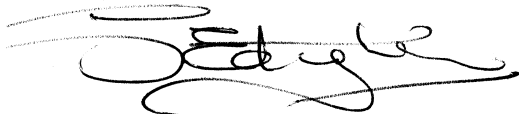

The level of service that I received from ETA was without a doubt of a very high standard, prompt and cost effective, leaving me with a Portfolio that I would be proud to submit to the TRA.

My assessor Mr. Peter Ball dealt with my trade assessment and during this time I found his professionalism and discretion to be very business like. ETA understood the urgency for this application due to the fact that I would have to lodge for an Australian visa before my immanent 45<sup>th</sup> birthday.

Upon being referred to ETA communication between us was regular, I found them informative and they made sure that I knew of the next steps for a timely completion. All the fees were set out before I agreed to proceed leaving me with no hidden charges or surprises in the final bill. This led to a successful outcome that was within my budget. The end goal was to receive a trade certification recognised by the Australian authorities.

I would have no hesitation in recommending ETA as part of the "Traderecognition.com" consortia for anybody considering applying for a Skills Assessment.

Yours sincerely

Stephen C Edington
