Re: On the Job Training provided by MTAQ

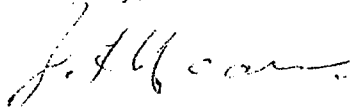

Dear Peter,

We would like to express our satisfaction with MTAQ "on the job training" of our apprentice. We find that this method of training creates a higher standard of learning and absorption as the apprentice is doing hands on in the work environment. It also works well with the continuity of our work flow.

The one-on-one training provided by your trainer and assessor Alex Fletcher has been fantastic and has seen our apprentice fast-track his apprenticeship. We're happy with the standard of competency our apprentice has shown.

For any future apprentices we take on, the on the job training by MTAQ will definitely be our preferred method of training.

Yours truly,

John T. Hearn
